

CO1 - AT2

① construct a concept map illustrating the complete machine learning workflow for predicting house prices using suitable ML algorithm

② Identify the key terms

- square feet
- number of Rooms
- location
- type of house
- 1 BHK / 2 BHK

③ Relationship Dataset

④ Demonstration of Dataset

S.NO	Square Feet	NO. of Rooms	location	type of house
1	100	2	cheema	. Semi
2	350	4	Anna Nagar	Billy

⑤ Designing Data flow Diagram

③ concept map:

② construct the concept map demonstrating how classification algorithm are used in medical disease prediction.

① Identify the key terms:

- a) Blood type
- b) sugar low carb high
- c) gender
- d) No. of kgs
- e) Food habits

② Relationship Dataset

Supervised Learning $\rightarrow$ training data $\rightarrow$ classification algorithm

③ Demonstration of Dataset

S.NO	Blood type	gender	sugar level	kgs
1	B+	M	low	50
2	A-	F	high	60
3	OB+	F	low	65

④ Designing Dataflow

⑤ concept map:

③ credit card fraud detection

① Identify the key terms:

- a) card type
- b) limit
- c) promotion messages
- d) pin
- e) card valid date

② Relation ship Dataset:

supervised learning $\rightarrow$ ^{too} training data $\rightarrow$ linear regression

③ Demonstration of Dataset

S.NO	card type	limit	pin	card valid Date
1	silver	1,00,000	4546	17/9/30
2	gold	100000000	1245	6/8/28
3	platinum	100000000000	1237	9/2/29

④ Designing Data flow Diagram:

③ concept map:

④ Student performance prediction using multiple linear regression

① Identify the key terms:

- a) Name
- b) Regno
- c) gender
- d) Cgpa
- e) Attendances

② Relationship Dataset:

supervised learning → training Dataset → multiple linear regression

③ Demonstration of Dataset :

S.NO	Name	Resno	gender	cgpa	Attendance
1	Arisud	192425080	M	8.80	95%
2	Aman	192425021	M	8.50	93%
3	Somesh	192425019	M	8.75	90%

④ Designing Data Flow :

Start → student performance → preprocessing → training → testing
↓
classification
↓
stop — Accuracy

⑤ Concept map :

Loan Approval prediction Decision tree

① Identify the Dataset :

- a) Name
- b) Amount
- c) credit score
- d) Approval
- e) ~~go~~ Documentation

② Relationship Detect :

supervised learning $\rightarrow$ training data $\rightarrow$ Decision tree

③ Demonstration of Dataset :

S.NO	Name	Amount	credit score	Approval
1	Arun	100000	850	Yes
2	Vishu	50000	600	No

④ Designing Data flow :

1

Concept map:
